[h-kumar-76214a168/](#)

Address

Greater Noida, U.P. India

Skills

Programming & Frameworks

Python (ML, DL, NLP, Generative AI),
PHP (Laravel), JavaScript, SQL

Machine Learning & AI

Scikit-learn, Pandas, NumPy,
Seaborn, Matplotlib, Deep Learning,
NLP, Generative AI

Web Development

Laravel, RESTful APIs, MySQL, HTML,
CSS (Bootstrap), React (Basic)

Tools & Platforms

Git, GitHub, AWS S3, PuTTY, WinSCP,
Linux (Basic)

Security & Compliance

MFA, eKYC, Geofencing, SQL
Injection Prevention, Secure
Sessions

Design & UI/UX

Adobe XD, Figma, Illustrator,
Photoshop

Others

WordPress (Customization &
Deployment)

Product

MaddoxPay

the Website | the Service App |
RESTful APIs

💡 *(Fintech ecosystem handling digital
payments, AEPS, DMT, PAN services, and
payouts via Axis Bank integrations.)*

Professional Summary

Results-driven **Full-Stack Developer & AI/ML Practitioner** with **4+ years of experience** in developing and scaling **secure fintech platforms** and **AI-driven web applications**. Proficient in **PHP (Laravel)**, **Python**, **SQL**, and **RESTful APIs**, with hands-on expertise in **payment gateways**, **biometric authentication (UIDAI)**, **AEPS**, **PAN services**, and **large-scale transaction systems**. Skilled in **Machine Learning**, **Deep Learning**, and **Predictive Analytics**, integrating models into production-grade dashboards and business applications.

Adept at managing **end-to-end development cycles**, including **server management (Windows/CentOS)**, **security implementations (MFA, geofencing, anti-fraud modules)**, and **query optimization** for high-performance systems. Recognized for bridging **software engineering and data science** to deliver scalable, reliable, and compliant solutions in dynamic fintech environments.

Professional Experience

Vayam Technologies Ltd.

August 2023 – Present

Full-Stack Developer (Laravel & AI/ML– MaddoxPay Fintech Platform)

Scalability & Performance

- Engineered high-volume **recharge and bill payment modules** for *MaddoxPay*, processing **100K+ transactions monthly** with improved throughput and reliability.
- Managed **daily payouts exceeding ₹1M** via **Axis Bank integrations** (NEFT, RTGS, and IMPS), automating settlements for both manual and scheduled batches.
- Architected a **cross-site PAN card booking system**, enabling **40K+ secure transactions per month** with real-time reconciliation across vendors.
- Designed and optimized **admin analytics dashboards** to support heavy reports and predictive insights through integrated ML models.
- Refined **database architecture and query execution**, achieving **2x faster response times** and improved scalability under high load.

Security & Compliance

- Implemented **geofencing, multi-factor authentication, and secure session management** for sensitive financial modules.
- Developed an **“antivirus-style” file scanning module** to detect and prevent malicious uploads.
- Integrated **biometric eKYC and 2FA (Morpho & Mantra)** with **UIDAI authentication APIs**, ensuring compliant and secure user onboarding.
- Built a **proxy and suspicious-login prevention framework** to enhance fraud detection and access security.
- Automated **multi-channel notifications (SMS, Email, and WhatsApp)** for transaction alerts, verification, and fraud prevention.
- Reduced **platform downtime by 70%**, significantly improving availability and transaction reliability.

Infrastructure & DevOps

- Administered **Windows and CentOS production servers**, overseeing deployments, service configurations, and uptime monitoring.
- Created and maintained **technical documentation**, API specifications, and process flow diagrams for internal and vendor integrations.

Education

B.Tech. Information Technology
Dr. A.P.J. Abdul Kalam Technical
University, Lucknow
2020

Certifications

**Executive Post Graduate
Certificate in AI & ML**
Intellipaat – Ongoing (2025)

Microsoft SQL Certification
Intellipaat – 2025

**Virtual Lab Development Program
(Bootathon)**
IIT Bombay – 2018
Gold Certificate for outstanding
performance

Achievements &
Leadership

Winner – Junkyard (AVTAR’17 Tech
Fest)
Leadership roles in Training &
Placement Cell, Literary & Fine Arts,
College Fests (2017–2019)

Workshops

Android App Development
IIT Roorkee, IIT Kanpur

Internet of Things
IIT Kanpur

Wireless Robotics / Sixth Sense
IIT Kanpur

Hobbies

Reading, Writing, Photography,
Music

Languages

English – Proficient
Hindi – Native

Flyde Digital Solutions

July 2022 – August 2023

Full-Stack Developer

- Delivered **8+ full-stack web platforms** end-to-end using **Laravel, Livewire, Bootstrap, and MySQL**, ensuring responsive and scalable performance.
- Integrated **multiple payment gateways** (Razorpay, PhonePe, CC Avenue, and Instamojo) and **shipping APIs** (Shiprocket, DTDC), enabling seamless **checkout and fulfillment workflows**.
- Implemented **AWS S3-based media management**, ensuring **secure, scalable storage and faster content delivery**.
- Optimized **database queries and backend logic**, improving **system performance by ~25%** for high-traffic portals.
- Designed and integrated **RESTful APIs** for modular functionality and third-party service connectivity.
- Conducted **code reviews**, enforced **clean architecture principles**, and strengthened **application security** across projects.
- Collaborated directly with **clients and cross-functional teams**, translating business needs into **user-centric, production-ready solutions**.

Saatirmind Software Services

May 2021 – July 2022

Laravel Developer

- Developed and maintained **custom e-commerce websites** using **Laravel and MySQL**, delivering modular, maintainable code.
- Supported **feature enhancements and custom module development**, improving overall platform flexibility.
- Proactively identified and fixed **critical bugs**, reducing downtime by **10%** and improving user reliability.
- Collaborated with senior developers to **standardize code practices** and improve deployment efficiency.

Projects

HR Analytics (ML Project)

- Performed employee data analysis to identify key factors influencing attrition.
- Applied logistic regression and decision tree models for predictive insights.
- Provided recommendations to improve employee retention strategies.

Walmart Sales Forecasting (ML Project)

- Built time-series forecasting models (ARIMA/SARIMA) to predict future sales trends.
- Conducted data preprocessing, feature engineering, and EDA to derive business insights.

Customer Churn Prediction (ML Project)

- Developed machine learning model to predict customer churn using classification algorithms.
- Improved model accuracy through feature selection and hyperparameter tuning.

Price Prediction (ML Project)

- Built regression models to predict product pricing based on historical and market data.
- Enhanced prediction accuracy through feature scaling and advanced regression techniques.
